Level 3 Training

This guidance has been written by Dr Alaba Ajanaku, Paediatric Specialty Trainee in the Wales Deanery.

Level 3 training in paediatrics is the final step before obtaining the CCT. By this stage you will have decided which career path you are pursuing:

- General Paediatrics
- General Paediatrics with special interest in a specific aspect of Paediatric medicine.
- Grid training which leads to being a specialist in a particular field of paediatric medicine.

Based on the guidance for Level 2, you should be well on your way to having a portfolio that supports your career intention and set you apart from the competition. Keep at it! Refer to the curriculum, including the leadership and management section, to identify areas you need focus on. Discuss with your supervisor initiatives that will be of benefit when you become a consultant.

Attend consultant preparation courses and seek interview practice.
